Korišćeni programski jeyici

Za izradu sajta koriscene su sledece tehnologije:

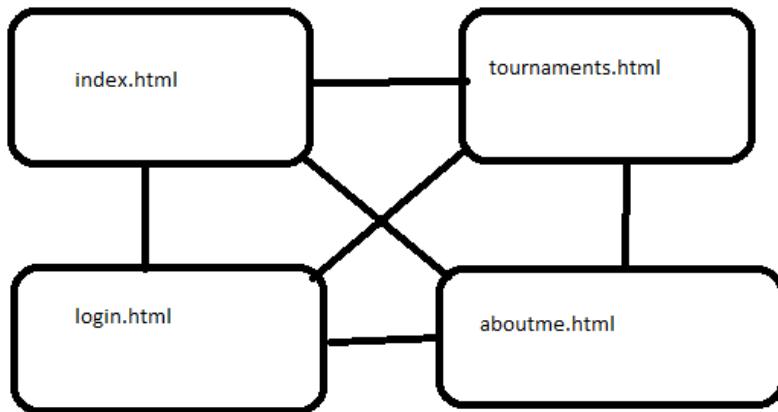

- Html
- Css
- Javascript
- Jquery
- Photoshop
- Visual studio code

Opis funkcionalnosti

- Dinamicko ucitavanje navigacionog menija kao i menija u futeru(nav meni na rezolucijama manjim od 980 dobija hamburger ikonicu) na svakoj stranici
- Klikom na hamb. Ikoniku se otvara,ali i zatvara dodatni meni
- Dinamickicko ispisivanje hidden menija na svakoj stranici
- Dinamicko ispisivanje i kreiranje h i p tagova na index.html strani
- Dinamicko ispisvianje i kreiranje texta o autoru
- Provera regularnih izraza za slanje poruke autoru
- Na height od 500px se pojavljuje ikonica koja vodi na vrh strane(scroll to top)
- Dinamicko ispisivanje teksta vezanog za turnire, setovanje atributa, kao
- Dinamicko dodavanje slika za odredjeni turnir
- Show more button koji prikazuje dodatan tekst
- Proveravanje regularnih izraza, i dinamicko ispisivanje ukoliko nesto nije u skladu sa zadatim templejtom regularnog izraza, kao i remove-anje istog ukoliko je pri sledecem unosu uredu

ABOUT GAME

League of Legends (LoL) is a multiplayer online battle arena video game developed and published by Riot Games for Microsoft Windows and macOS. Inspired by the Warcraft III: The Frozen Throne mod Defense of the Ancients, the game follows a freemium model and is supported by microtransactions. In League of Legends, players assume the role of a "champion" with unique abilities and battle against a team of other player- or computer-controlled champions. The goal is usually to destroy the opposing team's "Nexus", a structure that lies at the heart of a base protected by defensive structures, although other distinct game modes exist as well with varying objectives, rules, and maps. Each League of Legends match is discrete, with all champions starting off relatively weak but increasing in strength by accumulating items and experience over the course of the game. Champions span a variety of roles and blend a variety of fantasy tropes, such as sword and sorcery, steampunk, and Lovecraftian horror. Although the discrete nature of each match prohibits an overarching narrative in-game, the various champions make up a large and ever-evolving fictional universe developed by Riot Games through short stories, comics, cinematics, and books.

Development

Riot Games was founded by Brandon "Ryze" Beck and Marc "Tryndamere" Merrill, former business students and roommates at the University of Southern California, in Los Angeles in September of 2006. Citing a dissatisfaction with their post-college careers and the business practices of contemporary video game developers, they decided to create their own company dedicated to making free-to-play games that constantly evolved and developed through player feedback. Beck and Merrill recruited Defense of the Ancients veteran Steve "Guinsoo" Feak, as well as several other experienced developers, to help them build and refine the game that would later become League of Legends. Development, originally under the name Onslaught, was difficult, owing to technical limitations and Beck and Merrill's conflicting visions with many publishers at the time. They eventually partnered with Chinese conglomerate Tencent, which now fully owns the game and a majority share of the company's stock. Three years after the company's founding, League of Legends was released with 40 champions on October 27, 2009. Development of the game continued during its early years based primarily on player feedback from online forums. An abridged version of the game called League of Legends: Wild Rift for mobile and console, was announced on October 15, 2019.

Popularity

League of Legends was well received upon its release, and has since grown exponentially in popularity, with an active and expansive fanbase around the world. By July 2012, League of Legends was the most played PC game in North America and Europe in terms of the number of hours played. League has among the largest footprints of any game in streaming media communities on platforms such as YouTube and Twitch; it routinely ranks first in the most-watched hours. In September 2016, Riot Games estimated that there are over 100 million active players each month, and in September of 2019, the company revealed that the game boasts nearly 8 million peak concurrent users each day. The game's popularity has led it to expand into merchandise, with toys, accessories, and apparel, as well as additional tie-ins to other media through music videos, web series, and documentaries. League of Legends has earned praise for its diverse artistic and musical departments, particularly for its character design and production value. Various in-game champions comprise three distinct virtual music groups that have earned significant real-world attention: Pentakill, a heavy metal band, K/DA, a K-pop girl group, and True Damage, a hip hop group.

Tournaments

League of Legends has an active and widespread competitive scene, which is commonly described as the preeminent global eSport and a major factor towards the industry's legitimization. In North America and Europe, Riot Games organizes the League Championship Series (LCS), located in Los Angeles and the League of Legends European Championship (LEC), located in Berlin, respectively, each of which consist of 10 professional teams. Similar regional competitions exist in China (LPL), South Korea (LCK), and various other regions. These regional competitions culminate with the annual World Championship. The 2019 League of Legends World Championship had over 100 million unique viewers, peaking at a concurrent viewership of 44 million, with a minimum prize pool of US\$2.5 million that featured a collaboration between Riot Games and Louis Vuitton. The 2018 Mid-Season Invitational had an overall peak concurrent viewership of 19.8 million, while the finals had an average concurrent viewership of 11 million. League of Legends is the world's most watched eSport, with total and peak viewings that not only outdistance direct competitors such as Dota 2 and Fortnite, but other traditional sports events such as the Super Bowl.

A screenshot of a tournament page featuring three main sections: LCS, LEC, and LCK. The LCS section on the right contains a large image of a League of Legends esports arena, the title "LCS", and a detailed description of the competition. The LEC section in the center contains a smaller image of an esports arena, the title "LEC", and a description of the European League. The LCK section at the bottom contains a logo for the "LEAGUE OF LEGENDS EUROPEAN CHAMPIONSHIP". Navigation arrows are visible at the bottom left, and a search bar with the text "LCK" is at the bottom right.

LCS

Formerly known as the NA LCS, the LCS is the first competition most English fans tune in to. Now, technically, it is not a tournament. It is a league. That said, leagues play a huge role in the world of League of Legends esports, so it'd be a mistake to dismiss them. The LCS acronym itself stands for the "League of Legends Championship Series", and the league itself is the premier LoL esports competition in North America that takes place in Los Angeles, USA.

Over the course of the competition, 10 professional teams play in the double round robin format. This means that each team plays twice against every other lineup, and so, for 9 weeks of the regular season, they keep clashing in fierce Bo1 matches. The winners get a point added to their overall score while the losers walk away empty-handed.

Once the regular season ends, 6 teams with the best win/loss record advance to the playoffs, and 2 best-performing lineups get a bye to the Semifinals. The playoffs format shifts towards Bo5s—prolonged series where a team needs to win 3 games to claim victory. This structure is ideal for betting on League of Legends matches, as all participants get to adjust their strategies to highlight their strengths and cover their weaknesses, so there's less room for an upset compared to Bo1s. The team that crushes all enemies in its path is crowned the LCS champion, receiving the trophy and a sizeable chunk of the prize pool.

Keep in mind that every year has two LCS seasons: Spring Split and Summer Split. And while the Spring Split comes with numerous benefits like Circuit Points, Rift Rivals invitations, and Mid-Seasonal Invitational tickets, it's the Summer Split that matters the most. Because the three LCS teams that acquire the most Circuit Points by the end of summer, qualify for the largest LoL esports tournament in the scene—the League of Legends World Championship.

Show more

LEC

Much like its North American cousin, the LEC (or, in the past, the EU LCS) is a league. The acronym stands for "League of Legends European Championship", and the event itself takes place in Berlin, Germany. The LEC format mirrors that of the LCS, making it easy for viewers to switch between both competitions. One notable difference is the fact that the LEC has only recently adopted franchising. With that, the league is expected to go through growing pains that come with the implementation of the permanent partnership system, and it might take some time for the LEC to catch up to its North American counterpart.

Show more

LCK

As you might've guessed by this point, the LCK is also a league. However, it's wildly different from the LCS/LEC. The acronym stands for the "League of Legends Champions Korea", and the competition takes place in Seoul, South Korea. Once again, the regular season consists of 10 teams playing against each other for 9 weeks of the double round robin format, but the matches themselves take the shape of Bo3s, so LCK teams have to take 2 games to get that W.

Show more

LPL

The LPL is another LoL esports league worth following. The acronym stands for "League of Legends Pro League", and the competition itself takes place in China. Up until recently, the LPL was overshadowed by the LCK, since the latter was viewed as a much more cutthroat league. However, everything changed when the LPL representatives—Invictus Gaming—claimed the World Championship trophy in 2018.

Galleru

LCK

As you might've guessed by this point, the LCK is also a league. However, it's wildly different from the LCS/LEC. The acronym stands for the "League of Legends Champions Korea", and the competition takes place in Seoul, South Korea. Once again, the regular season consists of 10 teams playing against each other for 9 weeks of the double round robin format, but the matches themselves take the shape of Bo3s, so LCK teams have to take 2 games to get that W. The playoffs structure is even more distinct. For one, only 5 teams make the cut, so there's already one less contender compared to Europe and North America. Not only that but the lineup with the best regular season record automatically secures a bye to the finals. Meanwhile, the second-best team is seeded into the Semifinals, the third-best team qualifies for the Quarters, and the last two teams play in the wildcard round. All matches with the exception of the wildcard round follow the Bo5 format.

Finally, the LCK participants have to worry about the looming dread of relegation. Two teams with the worst regular season record are knocked down to the Promotion Tournament where they can get eliminated from the league. Teams do everything in their power to avoid this outcome, and the competition is much stiffer as a result.

LPL

The LPL is another LoL esports league worth following. The acronym stands for "League of Legends Pro League", and the competition itself takes place in China. Up until recently, the LPL was overshadowed by the LCK, since the latter was viewed as a much more cutthroat league. However, everything changed when the LPL representatives—Invictus Gaming—claimed the World Championship trophy in 2018.

The first thing that stands out about the LPL is its scale. This competition is much bigger than other League of Legends esports events, and it has a total of 16 professional teams fighting against each other in various venues all over China. The regular season lasts for 10 weeks, as each team has to go face its opponents in a Bo3 single round robin format.

Afterwards, 8 best-performing teams advance to the single elimination Bo5 playoffs. It's worth noting that the top-2 teams advance directly into the semifinals, the third and fourth teams get seeded into the round of 6, and the remaining competitors end up in the round of 8. With that, many squads have to go through hell and high water if they want to get within arm's reach of the LPL trophy.

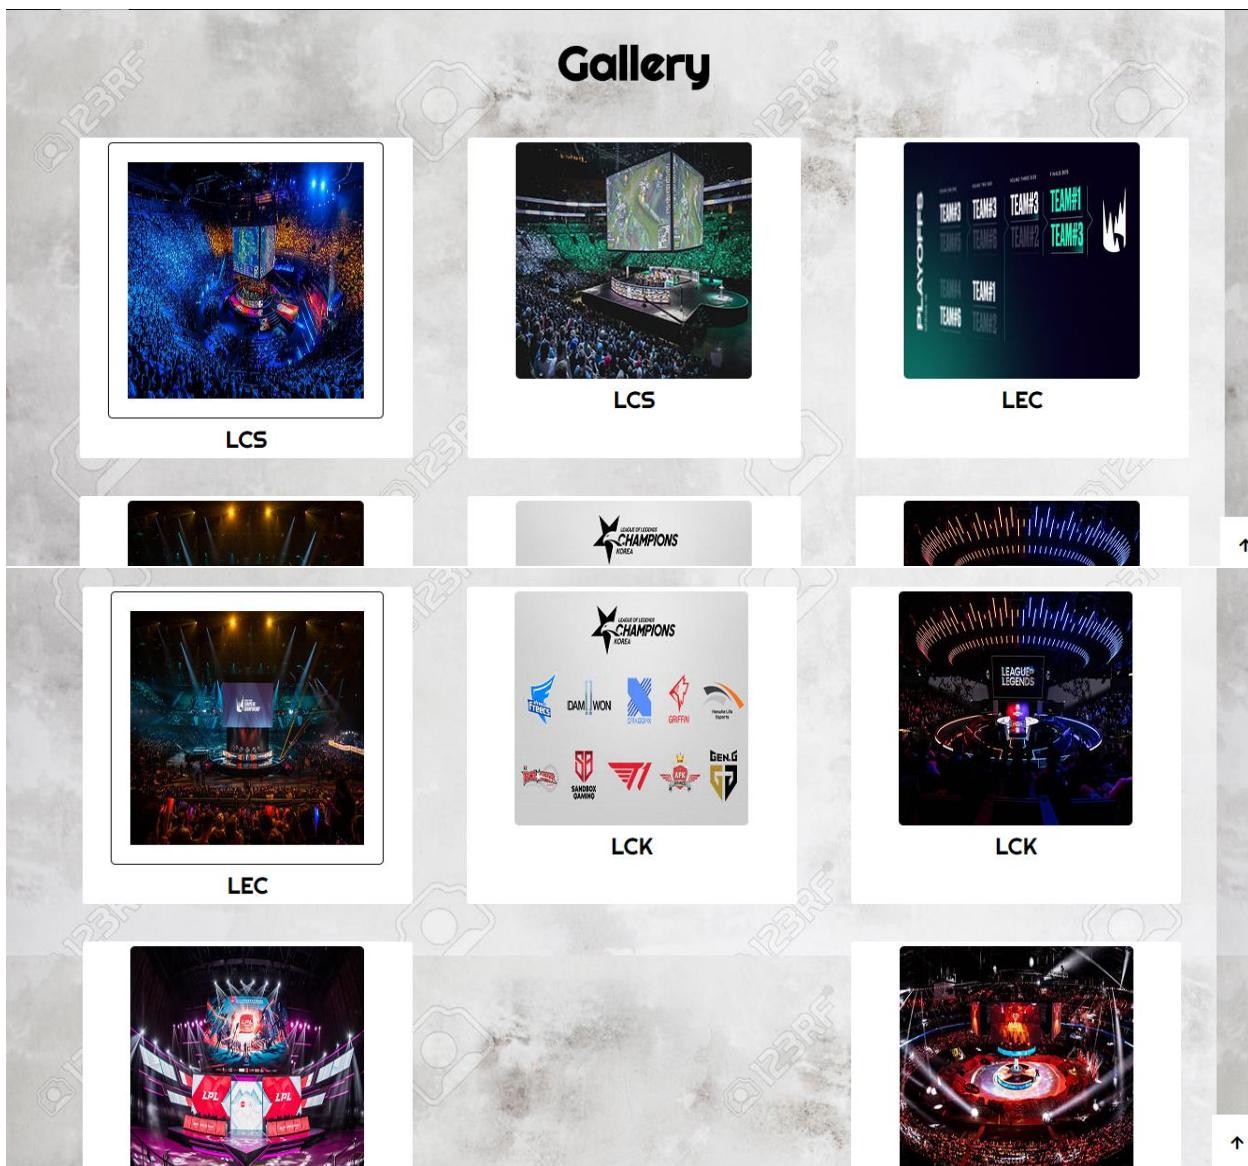

Much like the LCS and LEC, the LPL is franchised, so Chinese teams don't have to worry about relegation. That said, the competition is fierce purely because of the large number of participants and the gigantic player base each of them can tap into. Every team has at least one player that would be considered a superstar in another region. And while not everyone knows how to use them, it still speaks volumes about the level of Chinese League of Legends.

var a = document.createElement("p")
a.innerHTML = "League of Legends (LoL) is a multiplayer online battle arena video game developed and published by Riot Games for Microsoft Windows and macOS. Inspired by the Warcraft III: The Frozen Throne mod Defense of the Ancients, the game follows a freemium model and is supported by microtransactions. In League of Legends, players assume the role of a \"champion\" with unique abilities and battle against a team of other player- or computer-controlled champions. The goal is usually to destroy the opposing team's \"Nexus\", a structure that lies at the heart of a base protected by defensive structures, although other distinct game modes exist as well with varying objectives, rules, and maps. Each League of Legends match is discrete, with all champions starting off relatively weak but increasing in strength by accumulating items and experience over the course of the game. Champions span a variety of roles and blend a variety of fantasy tropes, such as sword and sorcery, steampunk, and Lovecraftian horror. Although the discrete nature of each match prohibits an overarching narrative in-game, the various champions make up a large and ever-evolving fictional universe developed by Riot Games through short stories, comics, cinematics, and books."

var g = document.getElementById("development")
var r = document.createElement("h1")
r.setAttribute("class", "htagovi")
r.innerHTML = "Development"
g.appendChild(r);
var g2 = document.createElement("p")
g2.innerHTML = "Riot Games was founded by Brandon \"Ryze\" Beck and Marc \"Tyndamere\" Merill, former business students and roommates at the University of Southern California, in Los Angeles in September of 2006. Citing a dissatisfaction with their post-college careers and the business practices of contemporary video game developers, they decided to create their own company dedicated to making free-to-play games that constantly evolved and developed through player feedback. Beck and Merill recruited Defense of the Ancients veteran Steve \"Guinsoo\" Feak, as well as several other experienced developers, to help them build and refine the game"

```

that would later become League of Legends. Development, originally under the name Onslaught, was difficult, owing to technical limitations and Beck and Merrill's conflicting visions with many publishers at the time. They eventually partnered with Chinese conglomerate Tencent, which now fully owns the game and a majority share of the company's stock. Three years after the company's founding, League of Legends was released with 40 champions on October 27, 2009. Development of the game continued during its early years based primarily on player feedback from online forums. An abridged version of the game called League of Legends: Wild Rift for mobile and console, was announced on October 15, 2019."

c2.appendChild(b2)
var a2 = document.createElement("p")
a2.innerHTML = "League of Legends was well received upon its release, and has since grown exponentially in popularity, with an active and expansive fanbase around the world. By July 2012, League of Legends was the most played PC game in North America and Europe in terms of the number of hours played. League has among the largest footprints of any game in streaming media communities on platforms such as YouTube and Twitch; it routinely ranks first in the most-watched hours. In September 2016, Riot Games estimated that there are over 100 million active players each month, and in September of 2019, the company revealed that the game boasts nearly 8 million peak concurrent users each day. The game's popularity has led it to expand into merchandise, with toys, accessories, and apparel, as well as additional tie-ins to other media through music videos, web series, and documentaries. League of Legends has earned praise for its diverse artistic and musical departments, particularly for its character design and production value. Various in-game champions comprise three distinct virtual music groups that have earned significant real-world attention: Pentakill, a heavy metal band, K/DA, a K-pop girl group, and True Damage, a hip hop group."

```

```

var z3 = document.createElement("p")
z3.innerHTML = "League of Legends has an active and widespread competitive scene, which is commonly described as the preeminent global eSport and a major factor towards the industry's legitimization. In North America and Europe, Riot Games organizes the League Championship Series (LCS), located in Los Angeles and the League of Legends European Championship (LEC), located in Berlin, respectively, each of which consist of 10 professional teams. Similar regional competitions exist in China (LPL), South Korea (LCK), and various other regions. These regional competitions culminate with the annual World Championship. The 2019 League of Legends World Championship had over 100 million unique viewers, peaking at a concurrent viewership of 44 million, with a minimum prize pool of US$2.5 million that featured a collaboration between Riot Games and Louis Vuitton. The 2018 Mid-Season Invitational had an overall peak concurrent viewership of 19.8 million, while the finals had an average concurrent viewership of 11 million. League of Legends is the world's most watched eSport, with total and peak viewings that not only outdistance direct competitors such as Dota 2 and Fortnite, but other traditional sports events such as the Super Bowl."

//ispisivanje texta
var xz = document.getElementById("PrviP")
xz.innerHTML = "Formerly known as the NA LCS, the LCS is the first competition most English fans tune in to. Now, technically, it is not a tournament. It is a league. That said, leagues play a huge role in the world of League of Legends esports, so it'd be a mistake to dismiss them. The LCS acronym itself stands for the \"League of Legends Championship Series\", and the league itself is the premier LoL esports competition in North America that takes place in Los Angeles, USA."
var xzz = document.querySelector(".drugiP")
xzz.innerHTML = " Over the course of the competition, 10 professional teams play in the double round robin format. This means that each team plays twice against every other lineup, and so, for 9 weeks of the regular season, they keep clashing in fierce Bo1 matches. The winners get a point added to their overall score while the losers walk away empty-handed."
var xzzz = document.querySelector(".treciP")
xzzz.innerHTML = "Once the regular season ends, 6 teams with the best win/loss record advance to the playoffs, and 2 best-performing lineups get a bye to the Semifinals. The playoffs format shifts towards Bo5s- prolonged series where a team needs to win 3 games to claim victory. This structure is ideal for betting on League of Legends matches, as all participants get to adjust their strategies to highlight their strengths and cover their weaknesses, so there's less room for an upset compared to Bo1s. The team that crushes all enemies in its path is crowned the LCS champion, receiving the trophy and a sizeable chunk of the prize pool."
var xzzzz = document.querySelector(".cetvrtiP")
xzzzz.innerHTML = "Keep in mind that every year has two LCS seasons: Spring Split and Summer Split. And while the Spring Split comes with numerous benefits like Circuit Points, Rift Rivals invitations, and Mid-Seasonal Invitational tickets, it's the Summer Split that matters the most. Because the three LCS teams that acquire the most Circuit Points by the end of summer, qualify for the largest LoL esports tournament in the scene—the League of Legends World Championship."
$('#buttonTour1').click(function() {
    $('#showHide1').toggle('slow');

    if ($('#showHide1').is(':visible')) {
        $(this).setAttribute('class', 'hide');
    } else {
        $(this).setAttribute('class', '');
    }
});
var xz1 = document.getElementById("prviP2")

```

```

xz1.innerHTML = "Much like its North American cousin, the LEC (or, in the past, the EU LCS) is a league. The acronym stands for “League of Legends European Championship”, and the event itself takes place in Berlin, Germany. The LEC format mirrors that of the LCS, making it easy for viewers to switch between both competitions."
var xzz1 = document.querySelector("#drugip2")
xzz1.innerHTML = "One notable difference is the fact that the LEC has only recently adopted franchising. With that, the league is expected to go through growing pains that come with the implementation of the permanent partnership system, and it might take some time for the LEC to catch up to its North American counterpart."

$('#buttonTour2').click(function() {
  $('#showHide2').toggle('slow');

  if ($('#showHide2').is(':visible')) {
    $(this).setAttribute('class', 'hide');
  } else {
    $(this).setAttribute('class', '');
  }
});
var xz12 = document.getElementById("prviP3")
xz12.innerHTML = "As you might've guessed by this point, the LCK is also a league. However, it's wildly different from the LCS/LEC. The acronym stands for the “League of Legends Champions Korea”, and the competition takes place in Seoul, South Korea. Once again, the regular season consists of 10 teams playing against each other for 9 weeks of the double round robin format, but the matches themselves take the shape of Bo3s, so LCK teams have to take 2 games to get that W."
var xzz12 = document.querySelector("#drugip3")
xzz12.innerHTML = "The playoffs structure is even more distinct. For one, only 5 teams make the cut, so there's already one less contender compared to Europe and North America. Not only that but the lineup with the best regular season record automatically secures a bye to the finals. Meanwhile, the second-best team is seeded into the Semifinals, the third-best team qualifies for the Quarters, and the last two teams play in the wildcard round. All matches with the exception of the wildcard round follow the Bo5 format."
var xzzz12 = document.querySelector("#trecip3")
xzzz12.innerHTML = "Finally, the LCK participants have to worry about the looming dread of relegation. Two teams with the worst regular season record are knocked down to the Promotion Tournament where they can get eliminated from the league. Teams do everything in their power to avoid this outcome, and the competition is much stiffer as a result."
$('#buttonTour3').click(function() {
  $('#showHide3').toggle('slow');
}

```

```

        if ($('#showHide3').is(':visible')) {
            $(this).setAttribute('class', 'hide');
        } else {
            $(this).setAttribute('class', '');
        }
    });

    var xz123 = document.getElementById("prviP4")
    xz123.innerHTML = "The LPL is another LoL esports league worth following. The acronym stands for “League of Legends Pro League”, and the competition itself takes place in China. Up until recently, the LPL was overshadowed by the LCK, since the latter was viewed as a much more cutthroat league. However, everything changed when the LPL representatives—Invictus Gaming—claimed the World Championship trophy in 2018."
    var xzzz123 = document.querySelector("#drugiP4")
    xzzz123.innerHTML = "The first thing that stands out about the LPL is its scale. This competition is much bigger than other League of Legends esports events, and it has a total of 16 professional teams fighting against each other in various venues all over China. The regular season lasts for 10 weeks, as each team has to go face its opponents in a Bo3 single round robin format."
    var xzzzz123 = document.querySelector("#treciP4")
    xzzzz123.innerHTML = "Afterwards, 8 best-performing teams advance to the single elimination Bo5 playoffs. It's worth noting that the top-2 teams advance directly into the semifinals, the third and fourth teams get seeded into the round of 6, and the remaining competitors end up in the round of 8. With that, many squads have to go through hell and high water if they want to get within arm's reach of the LPL trophy."
    var xzzzzz123 = document.querySelector("#cetvrtiP4")
    xzzzzz123.innerHTML = "Much like the LCS and LEC, the LPL is franchised, so Chinese teams don't have to worry about relegation. That said, the competition is fierce purely because of the large number of participants and the gigantic player base each of them can tap into. Every team has at least one player that would be considered a superstar in another region. And while not everyone knows how to use them, it still speaks volumes about the level of Chinese League of Legends."
